

A Request from Mickey Alderman

Good day!!! My name is Mickey Alderman. I am a full time mama, teacher and caregiver to our three special needs children. Two children who are autistic with many other labels and behaviors to daily contend with, ages 18 and 14 and one child age 9 who is epileptic with learning disabilities and cognitive delays, and several other labels. Recently we have had several financial problems, either with our vehicles breaking down, such as my truck breaking down an hour away from home after a special olympics swim meet or appliances breaking down, such as recently our dishwasher, which of course ran up our credit card, because we hardly have any money to put towards emergency needs. Also added to my stresses is a large concerns that our water heater will soon be going out, and hot baths, each and every night, are highly important to my youngest son's nigh-night time routine. We have entirely too many extra bills due to the many therapies and doctor's visits my children are in need of. My husband's pay is enough to cover the basic needs and bills, but we struggle to pay extra bills or meet our food needs. I am seeking help in purchasing 2 chromebooks for 2 of 3 of our disabled kids who are homeschooled. Keera Marie Alderman's chromebook that she uses for school and therapy has just died!!! We were trying to limp by on just the one device but that is not working for two homeschooled grade school children. Her and her youngest brother Tiberius are both in need of a Acer - 15.6" Chromebook - Intel Celeron - 4GB Memory - 16GB eMMC Flash Memory - Granite Gray or something similar that has good ratings and lasting quality for therapeutic as well as educational purposes. I do hope and pray you can be of assistance.

Thank you much for your time,
Mickey Alderman
